

Since masks are being used all day and students can only see each other's eyes, this activity allows students to interact with their peers by making observations about each other's eyes.

**Materials Needed:**

1 eye chart per student

mirror

markers/crayons

**Directions:**

1. Give each student an eye chart, markers and or crayons.
2. Students choose a classmate to do this activity.
3. Students will use a mirror to make a coloring of their own eyes.
  - Draw eyelashes
  - Draw eyebrows
  - Draw any other markings seen.
4. Students will then do step 3 using a chosen classmate.
5. Label each set of eyes.

**Discussion:**

Have partners share each other's drawings. Make observations about the differences and similarities of each.
